Z-WAVE EUROPE

WE MAKE LIFE BETTER

Z-Wave Europe based in Hohenstein-Ernstthal pioneered in importing the first Z-Wave products to Europe as a Value Added Resellers in 2008. Since then Z-Wave Europe has been the leading Value Added Distributor for Z-Wave and Zigbee based wireless home automation controls facing high and steady growth in its business.

Since November 2020, Z-Wave Europe has been cooperating under the brand Aeotec with the Samsung Electronics subsidiary "SmartThings", the industry leader in IoT technology and home connectivity. The open platform brings devices, developers and services together to create one of the largest ecosystems. The Aeotec Smart Home Hub is the first "Works as a SmartThings Hub" that can integrate SmartThings compatible devices via Z-Wave, Zigbee or Wi-Fi.
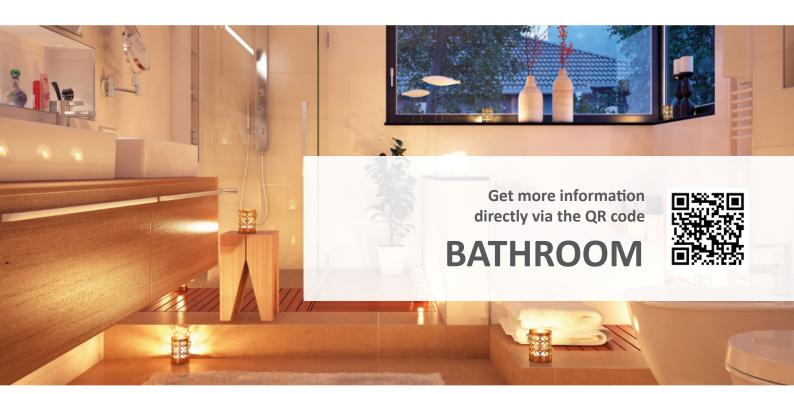

We make life better. Because we help you to find the right products and services to transform homes, flats and offices into smart homes. In doing so, we support our customers by expediting and simplifying all business processes. Through outstanding logistical and technical support, we increase our success in the market.

BATHROOM

SAFE AND DRY

Your Smart Home not only monitors windows and doors, but also ensures your safety in terms of water leakage. The Aeotec Waterleak Sensor detects water leaks at every point where water can occur, such as under the sink, in the bathroom or near the washing machine. When this happens, the POPP Flow Stop 2 automatically closes the main water valve and notifies you via push notification and blue lights throughout the house.
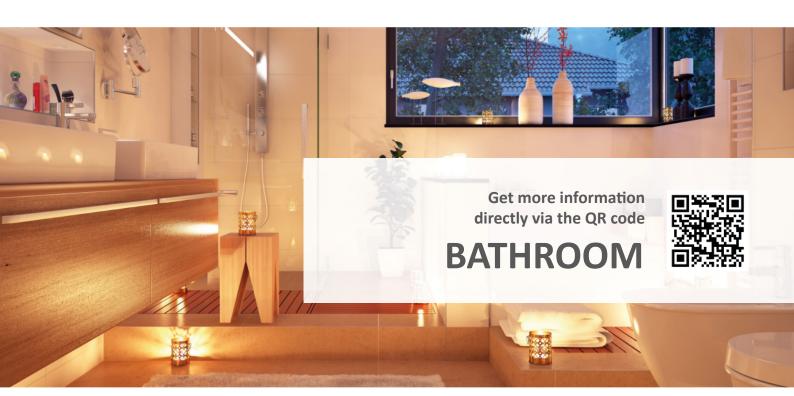

Used for this scenario:

- Samsung Washing machine
- Smartphone or Tablet
- POPP Flow Stop 2

BATHROOM

SUITABLE LIGHT

Do you know this? You have to get up again at night and are blinded by the light in the bathroom as if you were standing in a football stadium. Thanks to your Smart Home, you can now preset the suitable light. This way, your Smart Home not only regulates the light colour and colour temperature, but also controls the brightness.

Used for this scenario:

- Aeotec Smart Home Hub
- Aeotec Motion Sensor
- Zigbee lights or flush-mounted relay
