CHILD'S ROOM

BAD DREAMED

If the little ones have had a bad dream, parents rush to comfort them. But that's not always easy, because in the dark you can bump into the furniture. Switching on the light is not an option – otherwise the baby would be woken up. Thanks to a smart scene, the motion detector detects when the room is entered and switches on a lamp at dimming level 1%. This allows you to navigate purposefully to your child.

Used for this scenario:

- Aeotec SmartThings Hub
- Coloured Zigbee light
